## biography

### Hi, I'm Hamza!

I'm a user experience designer specializing in visual, interaction, and product design. I'm involved in the communities I'm a member of, working to lift voices and perspectives and advance

those around me. As a designer, I believe that my work should enable simple and gratifying experiences for its users. On the side, I love baseball, new foodie spots, furniture shopping, using lower-case when appropriate, and advocating for what's right.

## skills

Photoshop  
Illustrator  
InDesign  
After Effects

Sketch  
InVision/Marvel

Urdu

## education

### Bachelor of Arts, Carnegie Mellon University

Pittsburgh, PA; August 2015 – May 2019  
Majors in Human-Computer Interaction, Architecture  
GPA: 3.4/4.0

Honored with Dean's List placement, College Honors upon graduation, and served as the student commencement speaker

## experience

### User Experience Designer, Capital One

McLean, VA; July 2019 – present  
Spearheaded the visual and interaction design of Capital One's push towards CCPA compliance, which included a refresh of its existing privacy resources, easy-to-read disclosures, and the company's first consumer-facing data management tool.

### UX Design Lead, CMU Robotics Institute (Capstone)

Pittsburgh, PA; January 2019 – May 2019  
Collaborated with student developers, roboticists, designers, and product managers to design and develop a user interface to deploy, track, and operate a fleet of semi-autonomous robots in underground environments.  
This project was completed as part of the BHCI Senior Capstone, under the guidance of Vincent Aleven.

### Global Creative Services Intern, Gap Inc

San Francisco, CA; June 2018 – August 2018  
Under the guidance of registered architects, created schematic layouts for stores in domestic and global markets, designed fixtures and code-regulated signage, and developed the user interface for an innovative retail stock tracker to help customers locate specific sizes.

### Junior Designer, Mesarch Studio

New York, NY; June 2017 – August 2017  
Worked in a small team to design the interiors of a large apartment building to achieve immersive yet cost-effective design.
